

School Age Program

CCS Rebate is available (eligibility criteria applies).

Join us for fun, crafty, lively, and professional program. Our school age program gives children the chance to explore, speak, play and learning in special way. The program is including **MPM math**, **Jelic**, and **Mandarin** for primary school age children.

MPM math=Multi Process Model

It is a self-learning system personalised for each student. Through this personalised learning approach, MPM students optimise their learning independently, with deliberate minimal guidance by the instructor.

Through the MPM Program, children will learn to solve math problems in different ways rather than using only one traditional method.

Jelic

JELIC Program is an inquiry-embedded play approach to teaching and learning for children up to 7yrs old. This benefits children by allowing them to acquire knowledge, skills, and dispositions for holistic development, as well as experience the joy of learning that upholds curiosity, creativity, and confidence.

Mandarin

Children enjoy a consistent and high-quality program. Chinese Strokes order and new Chinese Characters will be reinforced and taught at the first 30 min of this group. This class is focused on simple characters writing and daily conversation practice. Basic Chinese Characters and topic base vocabularies are taught every week. This program provides the platform where students learn Mandarin through fun activities.

Time: Tuesdays, Wednesdays, and Thursdays 3:30pm-6pm (in school terms)

Venue: Little Lane Early Learning Centre Hawthorn campus

555 Glenferrie road, Hawthorn VIC 3122
